

Terry Chen

Mobile App Engineer · Product Engineer · AI Product Builder

I build and ship consumer & AI products end-to-end - product, engineering, monetization, and growth. Mobile-first, full-lifecycle.

Taiwan (GMT+8) · Open to remote, global teams · English / Mandarin Chinese

SUMMARY

Product-minded engineer and indie founder who ships consumer and AI products end to end - owning the product decisions, the engineering, the monetization, and the growth. Across **10+ years** I've built across 6+ live apps, including **3 I founded and shipped solo** with **16,000+ App Store ratings**, plus growth and AI work on Walli (**10M+ downloads**). I build AI-powered products - AI avatars, AI wallpaper generation, a multimodal AI companion (voice + video), and translation-driven multilingual search - and ship with multi-model AI agent workflows (Claude, Codex, Gemini) that compress design-to-release time. I optimize for outcomes that compound: LTV, engagement, retention, and products people keep using.

CORE SKILLS

Product & Ownership: product strategy, 0-to-1 product development, roadmap & scoping, monetization & pricing, growth experimentation, analytics-driven decisions

AI Product Building: LLM app integration, RAG-enhanced search, AI avatars & companions, prompt engineering, multi-model AI agent workflows (Claude, Codex, Gemini), rapid AI prototyping, SEO/ASO

Engineering: Swift, SwiftUI, iOS, Android (Kotlin), StoreKit 2, REST APIs & backend integration, real-time data pipelines, CI/CD

Growth & Data: A/B testing, feature flags, Mixpanel, Amplitude, RevenueCat, funnel analysis, LTV / engagement / retention metrics, App Store Connect

PROFESSIONAL EXPERIENCE

Senior Product & Growth Engineer - Tap Israel

Taiwan (Remote) - Present

Own conversion, monetization, and retention across Tap's consumer app portfolio (Walli, Charm, Luna). I own the product direction on these surfaces, pitch it directly to the CEO, ship it across iOS (SwiftUI) and Android, and run a continuous experimentation program - **40+ A/B experiments** shipped - measured on LTV, engagement, and retention.

1. Walli - 4K AI Wallpapers (flagship, 10M+ downloads, 4.5-star on Google Play, featured on Google Pixel).

[App Store](#) · [Google Play](#)

- Owned the paywall: rebuilt it (high-tier lifetime anchor, decoy tier, annual default) to lift trial starts **+27%**; a follow-on pricing test raised subscription ARPU **+19%**.
- Improved D7 retention **+12%** and cut onboarding drop-off **-18%** by reordering onboarding so users reach first value (a wallpaper applied) before any permission or signup ask.
- Raised the App Store rating from **4.3 to 4.6** and **doubled the review submission rate** by moving the review prompt to right after a success moment.
- Shipped a **universal smart search** with localized UI and real-time query translation so users search in their own language - opening discovery to non-English speakers and lifting search-driven engagement **+21%**.
- Shipped **AI wallpaper generation** (text-to-image): users create original wallpapers from a prompt in-app - bringing generative AI to a 10M-download consumer app.

2. Charm - AI Photo Editor & Avatars (one-tap AI retouch, AI avatars, enhancement).

[App Store](#)

- Shipped the AI-avatar monetization flow: showed the user's generated result before the paywall, lifting generation-to-purchase conversion **+34%**.

- Lifted retouch upsell conversion **+22%** with a before/after reveal on the user's own photo, placed immediately before the upsell.
- Raised first-session activation (first edited photo) **+41%** by removing pre-value friction from onboarding.

3. Luna - AI Companion (multimodal LLM companion - text, voice, and video chat, with real-time OCR/vision that reads context from the video feed).

[App Store](#)

- Raised new-user activation (first meaningful conversation) **+29%** by streamlining onboarding and moving companion personalization up front.
- Lifted subscription trial-to-paid conversion **+18%** and 30-day retention **+15%** with paywall and re-engagement experiments tuned to conversation milestones.
- Extended reach with multilingual, localized conversations so the companion speaks the user's own language.

4. Cross-product growth & AI-accelerated delivery:

- Ship production features solo using **multi-model AI agent workflows** (Claude Code, Codex, Gemini) - orchestrating codegen, review, and research to go from idea to shipped in **days, not weeks**.
- Lifted blended paywall conversion **+31%** across products - pricing-screen experiments (**+16%**) and re-engagement notifications (**+23%** 7-day reactivation).
- Built the experimentation platform behind feature flags (Firebase Remote Config): user-level randomization, power analysis, guardrail metrics, and honest significance testing for instant rollback and reliable reads.
- Owned delivery end to end - modern SwiftUI architecture and CI/CD automation from commit to TestFlight and store release.

Indie Founder & Solo Developer - Independent App Portfolio

Taiwan - 2016 to present

- Ran a one-person app studio: conceived, designed, built, launched, monetized, and supported **3 live consumer apps** - **16,000+ App Store ratings** at a **4.7-star average** - with no team and no funding.
- Owned everything a founder owns: product and roadmap, UX and brand, native + backend engineering, ASO and marketing, pricing, analytics, and live operations.
- Founder approach: find underserved niches, ship lean and affordable solutions solo, and grow them into profitable products with room to scale.
- [Garbage Truck Live Tracker](#) - real-time GPS tracking with arrival alerts: **4.3 stars, 8,808 ratings**.
- [Go Battery Station](#) - Gogoro swap-station locator and multi-stop route planner: **4.7 stars, 7,570 ratings**.
- [UBike Route Planner](#) - YouBike shared-bike journey planning: **4.8 stars**.

EDUCATION

National Yunlin University of Science and Technology

Master of Engineering (M.E.), Department of Electronic Engineering, 2012-2014

National Yunlin University of Science and Technology

Bachelor of Engineering (B.E.), Department of Electronic Engineering, 2008-2012

AWARDS

- Pittsburgh Invention Exhibition (INPEX), USA - Gold Medal (2014)
- Taipei International Invention Show, Taiwan - Gold Award (2012)
- Chairman's Special Award, Motech Industries (2011)
